

# DH Patterns and Fit

HIVIS®

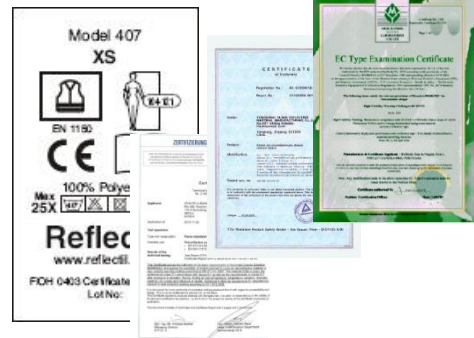

## “HIVIS®”

HIVIS® is an initiative by DH Patterns and Fit under which companies can outsource the safety class certification process for work wear apparel.

HIVIS® underlines DH’s commitment to the workwear industry. DH continues to increase quality, reduce costs and shorten time-to-market.

grams, communication with manufacturers and the certification institute, and much more, even the obligatory payments. You can expect to receive the safety class certificate within 8 weeks.

## “HIVIS® Takes Care of Certification”

HIVIS® takes care of your certification process. HIVIS® becomes an extension to your organization, if and when you need it.

Years of certification expertise and a thorough understanding of standards are readily available from DH to workwear companies. HIVIS® can be an add-on to your existing staff or replace employees during their absence or you may decide to outsource the task. HIVIS® is there for you.

## “DH’s Full Service Provider Offer”

DH is a full service provider to the workwear industry. HIVIS® is a natural extension of the service offer by DH. The service by DH follows all of the steps in your workflow; from design to patterns and Half-Proto’s®, from product development to certification.

The business objective by DH is to reduce your time-to-market by 50%, half the number of factory prototypes, reduce your development costs by 25% and provide the optimal combination of fit, function and manufacturability.

## “Define Your Target Market”

The HIVIS® process begins with asking a few simple questions; which styles and geographic markets do you wish to target, contact information of the textile manufacturers and prototype availability.

From than onwards, our HIVIS® specialist will take care of the textile test reports, shipments, language packs, picto-

## “HIVIS® Is the Sum of Expertise and Technology”

As part of HIVIS®, WisePatterns® supports conformity checks and calculates projected areas of fluorescent and reflective areas.

In combination with WisePatterns® functionality and Half-Proto’s®, DH continues to increase quality, reduce costs and shorten time-to-market.

## “Pricing”

Please refer to the price list in the Volume Purchase Agreement. HIVIS® services fall under the category for Product Development. The hourly rate is dependent on the VPA level I-V. The VPA level is determined by annual workload estimate; the higher the work volume, the higher the discount.

The cost of certification fluctuates. Erroneous information from the manufacturers or design or production faults may increase the expenditure. Combining garments with similar properties under the same HIVIS® assignment can reduce your costs.
